

Blue Dragon Jet Standard

This professional micro cable blower designed for blowing micro cables with the diameter from 2,5 to 10 mm is new on the European market. Micro cable diameter from 5 to 16 mm. Solid and simple construction enables easy operation of the blower and long-term durability. Due to high quality of the tray and power of the pneumatic engine the blow speed of up to 110 m/min is available at a distance of up to 2,5km. The distance of up to 3,5 km is possible when we use water instead of air.

BLUE DRAGON JET is the only blower in its class equipped with:
Cable Protection System (CPS) – a unique system of cable protection through the precise guiding of the movable part of the tray.

Dragon Jaws – specially constructed micro cable collets. The profiled sharp teeth provide secure fastening of the cables without decreasing their diameter.

Standard equipment - a set of micro cable collets, cable guide bushings and all necessary seals. The blower is equipped with a very strong and durable mechanical cable length counter. Two manometers indicate the air pressure on the head and pneumatic engines. The blower together with the equipment is usually delivered in a durable, wooden and aluminum case. The machine can be supplied with an electronic length meter.

Cable diameter [mm]	2,5 – 10	Weight [kg]	20
Duct diameter [mm]	5 – 16	Dimensions [mm]	580x300x320
Max blowing distance [m]	2500	Transport case	
Max blowing speed [m/min]	110	Dimensions [mm]	640x390x410
Max operating pressure [bar]	15	Set Weight [kg]	33
